Community Health Center will be there for immunizations and physicals.

Have an
awesome
Summer!

Counselor's Corner

May 2019

We are living in an electronic age, where many of our children have access to devices which connect them to the amazing world of the internet. Although there is a lot of great content out there, there are also things that young children should not see. Children are using tablets, phones, etc., at younger and younger ages. As parents it can be overwhelming to think about keeping our kids safe and limiting their exposure. Below are some tips for helping children stay safe online, from the website www.netsmartz.org. I encourage you to check out this website. It's a great resource for parents and children of all ages, about many different aspects of today's technology.

- Keep devices in a high-traffic area of your home.
- Establish limits for which online sites children may visit and for how long.
- Remember that Internet technology can be mobile, so make sure to monitor cell phones, gaming devices, tablets, and laptops.
- Surf the Internet with your children and let them show you what they like to do online.
- Know who is connecting with your children online and set rules for social networking, instant messaging, e-mailing, online gaming, and using webcams.
- Continually visit with your children about online safety. Here are a few discussion starters:
 - What are your favorite things to do online?
 - What is personal information? Why should you keep it private?
 - What could you do to be safer online?
 - What would you do if anyone online asked to meet you face-to-face?
 - Besides me, who do you feel that you can talk to if you are in a scary or uncomfortable situation?
